

Why Should I Have A Service Agreement?

Ever had a leaky faucet, stopped up drain, or wonder if your water heater was operating at top efficiency? Most of us have. Wouldn't it be nice to have someone check all of your plumbing needs once a year and to make minor repairs on the spot? This is just what your **Plumbing Service Agreement** is designed to do. With routine maintenance on your entire plumbing system, those minor irritations will disappear.

If an unexpected problem were to come up during the year you will receive *priority* service, as a Service Agreement customer. You will also receive a discount on all labor and materials necessary to make the repair.

And by the way, don't worry about scheduling. We will call you each year to schedule a convenient time that works with *YOUR* busy schedule.

A Service Agreement Customer Receives

- Annual check of plumbing system including minor faucet repairs (washers only)
- A discount on labor and materials should additional service work be required during the year
- Priority emergency service
- Peace of mind knowing your system is operating safely and efficiently

Once a Year We Will

Helpful Hints To Reduce Your Water Bill

1. Compare your water usage between taking a bath and a shower. Take a bath and mark the water level with a piece of masking tape. Next time you take a shower plug your drain and compare your water usage.
Which takes less water?
2. When taking a bath, or using your sink for dish washing, put in the stopper AS YOU BEGIN TO DRAW WATER. It will begin as cold water but the additional of the hot water will give you the proper temperature while reducing your water usage!
3. The difference in a five minute and ten minute shower is about 45 gallons of water. Shorten your time and save water!
4. A dish washer uses three to five times more water than doing dishes by hand. More labor, less water. You choose!
5. Don't run tap water waiting for it to cool. Keep a jug of water in the refrigerator. You will have a cooler drink and save water!
